

Uyanda Maseti

Software Engineer

Creative, detail-oriented, software engineer with a passion for solving business problems. Proven track record of creating and implementing successful full stack web applications. Looking to bring my skills to a tech company with global reach.

Work Experience

Developer at 100Devs, Johannesburg Gauteng

October 2021 – Present

- Collaborated with a team of developers to build modern and responsive web application using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects

Uyanda (Full stack Web App)

Cashier can take orders from customers with their names. Employees can login to the app and see orders that have been made, mark them as complete. Orders that have been completed will be logged with the employee name that completed the order.

100Hours project online shopping system (Full stack Web App)

An ecommerce web application.

Task Manager (Full stack Web App)

User can login to their profile and find their list of tasks. They can add new tasks through an input, which they can then edit or delete all their tasks in their profile.

Other projects

Small Lakes Casino Virtual Slot Machine, pop music web app with NASA API integration. On-demand background color changer for partnered Twitch streamer, and many more.

@Uyanda.dev, Mthatha EC

April 2025 - Present

Created full stack web applications and static websites for different clients across small and medium size businesses. Also consulted on SEO and social media strategy.
